

Annexe No. 1 – Rector's Ordinance R 640

AI as a formal support tool

The use of the following AI tools for formal editing does not need to be specified in detail unless this is explicitly and transparently stated in the assignment brief.

Method of use	Description and examples
Basic grammatical and stylistic editing	Tools for checking grammar and basic stylistic editing of text, including tools such as Writefull or Grammarly . Grammar checking is also offered by standard word processors .
References and indexes	Tools for searching, managing and generating citations, such as Google Scholar , Mendeley , or ResearchRabbit . Tools that generate certain sections of the thesis based on the main text created by the student: bibliographies and indexes.
