Laboratory Technician

Laboratory of Germ Cells

Job description

- Carries out fish husbandry, specifically zebrafish (*Danio rerio*) and turquoise killifish (*Nothobranchius furzeri*);
 - Performs sample collection and preparation for analyses and independently carries out analyses;
 - Performs technical tasks, including laboratory experiments;
 - Processes primary results into tables and graphs and provides technical support in the preparation of interim/final reports and scientific publications;
 - Carries out laboratory operation-related administrative tasks;
 - Performs procurement of laboratory consumables and personal protective equipment;
 - Performs maintenance of laboratory instruments and equipment;
 - Participates in the preparation and organization of scientific and professional conferences hosted by the laboratory.
-

We request

- Minimum secondary education in a biological field;
 - English language proficiency at least at B1 level, both spoken and written;
 - Work experience in a biological laboratory;
 - Experience with breeding aquaculture or aquarium fish species;
 - User-level computer skills – MS Office (Word, Excel, PowerPoint, Outlook);
 - Strong communication skills, ability to work independently, systematic approach, responsibility, goal orientation, attention to detail, organizational skills, willingness to learn new things, and ability to work under stress;
 - Good health condition.
-

We offer

- Interesting work in a friendly environment within an international team;
 - Opportunities for personal and professional development (language and professional training courses);
 - Additional employee benefits (5 weeks of vacation, meal allowance, discounted mobile phone plans, and preferential banking services with a partner bank).
-
